# Automatic-Financing.com IFrame Instructions

---

Auto Finance Leads

6/7/2011  
Version 1.5

**DTX**<sup>®</sup> **DTS**

## IFrame CSS Requirements

width: 850px

height: 750px

overflow: auto

## Usage

Place the following URL in a frame on your site:

```
<iframe src="https://www.automatic-financing.com/framein.aspx?generatorID=XXXX-XXXX" style="width:100%;height:750px;border:0 none;overflow:auto"></iframe>
```

Replace XXXX-XXXX with the DT Generator ID that was supplied to you.

In the above snippet the frame is set to the width of the page, the height is set the minimum and the “overflow” setting is set to auto. This will put the frame on your page without a scrollbar, but allows the scrollbar to appear for consumers that need it to avoid usability issues. If you prefer to not have a scroll bar, set the width to 850px.

## Optional Parameters

Campaign ID – A custom id that you assign to the lead source or campaign (campaign id) can be passed in with the lead by appending “campaignID” to the end of the URL as follows:

```
https://www.automatic-financing.com/framein.aspx?generatorID=XXXX-XXXX& campaignID =YYYYYYYYYY
```

Replace YYYYYYYYYY with any 10 character alpha numeric code that you would like to use for tracking.
